

SPECIES LIST OF THE FLORA AND FAUNA OF CORKSCREW SWAMP SANCTUARY

The following is the most complete and up-to-date flora and fauna species list that has been done for Corkscrew Swamp Sanctuary. Various sources were used to obtain this list, including all the previous lists beginning in 1957, field guides that included distribution or range maps or descriptions, the Resource Inventory And Analysis Of The Big Cypress National Preserve, and observations made by visitors and staff. Additions and deletions and other changes should continuously be made.

Some of these species are on Florida's State List of Endangered and Threatened Species and have been designated THR. for threatened and END. for endangered. Some species are on another State List developed and proposed by the Florida Committee On Rare And Endangered Plants And Animals, designated FCREPA, which is the same as the Florida Game And Freshwater Fish Commission's Threatened And Endangered Species List.
