

Courtney Witcher received her Bachelor of Science from the University of Michigan in 2018 and is now a second year Ecology and Evolutionary Biology PhD student at Florida State University.

She is broadly interested in the evolution of visual and auditory signals in anuran communication and sexual selection. Her current project examines the role of biofluorescence in mate choice and predation of frogs. She has also created a citizen science project and educational resource related to her PhD research called Finding Fluorescence ([https:// findingfluorescence.wixsite.com/home](https://findingfluorescence.wixsite.com/home)).

Her Lunch and Learn talk will cover her study of the glowing world that surrounds us and how you can illuminate the unseen in your own backyard.
